

PRIME GLOBAL PRIVATE LIMITED

Website Development Brief

1. Company Details

Company Name: Prime Global Private Limited

Website: www.primeglobal.org.in

Business: International Import & Export / Global Trading

Initial Focus:

Agricultural products sourced from India and supplied to international B2B buyers.

Tagline:

Driven by Trade. Defined by Trust.

Location:

Poonamallee, Chennai, Tamil Nadu, India

Office Address:

Plot No. 61, S.F. No. 41/2, Padmavathy Nagar, Vada Agaram, Poonamallee, Chennai, Tamil Nadu, India

Google Maps location code:

23QW+GM, Chennai, Tamil Nadu

2. Website Objective

Tell the developer:

“This is a B2B international trading website. It should make Prime Global look credible to overseas importers, distributors, suppliers, business partners and potential investors.”

The website should generate enquiries, not simply be a company brochure.

The main CTA should be:

“Enquire Now”

or

“Talk to Our International Sales Team”

3. Main Website Pages

I recommend these:

HOME

Short introduction to Prime Global and what you do.

ABOUT US

- * Company story
- * Vision
- * Mission
- * Values
- * Leadership
- * Why Prime Global

PRODUCTS

Initially agricultural products.

Each product should have:

- * Product name
- * Description
- * Origin
- * Available specifications
- * Packaging options
- * MOQ where applicable
- * Quality information
- * Enquiry button

Don't list products that you aren't actually prepared to supply.

GLOBAL MARKETS

Show the international markets/countries you are targeting.

Initially, don't claim:

"We export to 50 countries"

unless you actually do.

Instead say:

"Connecting Indian suppliers with international markets."

FOR BUYERS

Explain:

How international importers can work with Prime Global.

Process:

Requirement → Sourcing → Quality → Quotation → Order → Documentation → Shipment

FOR SUPPLIERS

Explain how Indian suppliers can work with Prime Global.

Supplier registration/enquiry → Product evaluation → Verification → Commercial discussion → Supply partnership

QUALITY & COMPLIANCE

Explain your approach to:

- * Supplier verification
- * Product specifications
- * Quality checks
- * Documentation
- * Applicable certifications
- * Shipment requirements

Don't claim certifications until you actually possess them.

INSIGHTS / NEWS

Later you can publish:

- * Agricultural market information
- * Export trends
- * Product information
- * International trade insights
- * Company announcements

This can also help your Google/SEO presence.

CONTACT US

Include:

Prime Global Private Limited

Office address

Email:

info@primeglobal.org.in

International Sales:

sales@primeglobal.org.in

Phone:

Your official business number

Google Maps:

23QW+GM, Chennai, Tamil Nadu

Add a proper enquiry form.

4. Homepage structure

I'd tell the developer to make the homepage roughly:

HERO

PRIME GLOBAL PRIVATE LIMITED

Driven by Trade. Defined by Trust.

Connecting Quality Indian Products with Global Markets

Buttons:

Explore Products

Send an Enquiry

SECTION 2 — WHO WE ARE

Prime Global Private Limited is an India-based international trading company focused initially on sourcing quality agricultural products and connecting reliable Indian suppliers with international buyers.

SECTION 3 — WHAT WE DO

Four cards:

GLOBAL SOURCING

Connecting international buyers with reliable Indian suppliers.

AGRICULTURAL PRODUCTS

Sourcing selected agricultural products based on market demand and quality requirements.

IMPORT & EXPORT

Coordinating commercial transactions and international trade operations.

BUSINESS PARTNERSHIPS

Building long-term relationships with suppliers, buyers and distributors.

5. How Prime Global works

Make this visual:

01

Understand Buyer Requirement

02

Source From Verified Suppliers

↓

03

Quality & Specification Review

↓

04

Commercial Quotation

↓

05

Order & Documentation

↓

06

Logistics & Shipment

↓

07

Delivery & Long-Term Partnership

This is one of the most important sections because it tells an overseas buyer exactly how you work.

6. Your Vision

Use:

“To become a trusted global trading enterprise connecting quality products and businesses across international markets.”

Mission

“To source quality products responsibly, connect them with international buyers, and deliver reliable, transparent and efficient trade solutions while building lasting global partnerships.”

7. Core Values

Use five:

TRUST

Transparent and dependable relationships.

QUALITY

Consistent products meeting agreed requirements.

RELIABILITY

Professional execution and communication.

GLOBAL CONNECTIVITY

Connecting businesses across markets.

SUSTAINABLE GROWTH

Building long-term commercial relationships.

8. Leadership

You can have a section:

Leadership

Vignesh M

Founder & Managing Director

Then:

Madhan

Co-Founder & Executive Director

Keep the biographies short initially. Don't exaggerate experience or achievements.

9. Design instructions

Give the developer your existing logo and tell them:

“Use the existing Prime Global logo exactly. Do not redesign or distort it.”

Use your existing brand palette:

Magenta → Purple → Deep Blue

with:

- * White

- * Light grey

- * Subtle gold accents where appropriate

The website should feel:

Corporate + International + Modern + Trustworthy

Avoid making it look like:

- ✗ a generic agricultural website

- ✗ a cheap trading website

✗ an overly colourful startup site

✗ an e-commerce store

You want something closer to a professional international B2B company website.

10. Very important: Mobile version

Tell them:

“The website must be fully responsive and designed mobile-first.”

Because many of your international prospects will initially open the website from:

* LinkedIn

* Email

* WhatsApp

* Google

on their phones.

11. Technical requirements

Ask the developer to include:

- * SSL/HTTPS
- * Fast loading
- * Mobile responsive
- * SEO-friendly structure
- * Google Search Console
- * Google Analytics
- * Sitemap
- * Robots.txt
- * Proper metadata
- * Open Graph/social sharing
- * Contact form
- * Spam protection
- * WhatsApp/business contact button if appropriate
- * Automatic enquiry email
- * Website backups
- * Admin login
- * Secure hosting
- * Domain/DNS properly configured
- * Professional business email integration

Your technical ownership

This is important:

The domain should remain under your/company control.

The developer should not own your domain, hosting, Google account, or website credentials.

Your tech@primeglobal.org.in account can manage the technical infrastructure.

12. Enquiry form

Make it more professional than:

Name / Phone / Message

For international buyers, use:

Name

Company

Country

Business Email

Phone/WhatsApp

Product Interested In

Required Quantity

Specification

Packaging Requirement

Destination Port/Country

Expected Purchase Frequency

Message

Then:

Submit Enquiry

This gives your sales team useful information immediately.

13. Email routing

I'd set it up like:

General enquiry → info@primeglobal.org.in

Product/buyer enquiry → sales@primeglobal.org.in

Website technical issue → tech@primeglobal.org.in

Career enquiry → hr@primeglobal.org.in

This keeps the website connected to your actual company structure.

14. SEO

Tell the developer that you want the website structured for searches such as:

* Agricultural products exporter India

* India agricultural exporter

- * Indian food products exporter
- * Agricultural products supplier India
- * India import export company
- * Agricultural products export Chennai
- * Indian spices exporter
- * [specific product] exporter India

But don't keyword-stuff the website.

SEO should be built around actual products and markets that you genuinely operate in.

15. Documents you'll need to give the developer

Prepare these:

Essential

- ✓ Prime Global logo — high-resolution
- ✓ Company name
- ✓ Tagline
- ✓ Office address
- ✓ Official email addresses
- ✓ Phone number
- ✓ Vision
- ✓ Mission

- ✓ About-company description
- ✓ Founder/Director names & titles
- ✓ Product list
- ✓ Product photographs
- ✓ Company photos/office photos, if desired

Later

- * CIN
- * GSTIN
- * IEC
- * PAN
- * Relevant registrations/certifications
- * Bank details only if actually required
- * Export credentials

Don't publish sensitive information unnecessarily.

16. One thing I strongly recommend

Have the developer build the website so that you can update products yourself.

For example:

Admin → Products → Add Product → Upload Photo → Description → Specifications → Publish

You shouldn't need to call the developer every time you add:

Turmeric

or remove:

Product X.

3M

17. Your website's main conversion path

The whole website should ultimately lead to:

Visitor

↓

Understands Prime Global

↓

Sees products

↓

Trusts company

Clicks Enquire

Sales receives lead

Sales qualifies buyer

Quotation

Negotiation

ORDER

That's what the website is for.

Send this to your website maker

You can literally tell them:

“I don’t want a basic company website. I want a professional B2B international trading website for Prime Global Private Limited, designed primarily for overseas importers, distributors, suppliers and business partners. The website must clearly communicate what we source, who we serve, how we execute international trade, and provide a strong enquiry/conversion system. Use our existing logo and magenta–purple–blue corporate identity. Make it modern, premium, mobile responsive, fast, SEO-ready and scalable.”

And before you pay the developer

Ask them for three things first:

1. Homepage design/mockup
2. Complete sitemap
3. Technology + hosting + maintenance quotation

Don’t give them the full payment upfront.

Also make sure you/company owns the domain and all administrator credentials.
